

# PROCESS TANKS FOR PLATING

Our freestanding tanks are designed and fabricated to meet your unique specifications. Utilizing Copolymer Polypropylene materials, coupled with our wealth of industry experience and cutting-edge technology to create long-lasting, high-quality, and maintenance-free solutions that surpass industry benchmarks. Rest assured, our tanks will perform above your expectations for many years to come.

## 2-YEAR WORKMANSHIP WARRANTY

Plastic Welding & Fabrication, Ltd. provides a two-year workmanship warranty for all custom fabricated products. This offers an additional layer of assurance to safeguard your investment.

### Excellent Chemical Resistance

Copolymer Polypropylene is an ideal material for construction in the process of Metal Plating, as it provides a chemically inert end product that is resistant to most of the chemicals used.

### Customizable

Optional additions include inlet fittings, drain fittings, coil protective panels, temperature monitoring, level sensor technology, automated flow solutions, overflow weirs, counter-flow solutions, tank heating systems, covers, and, much more.

### Self-Supported

Depending on the size of the tank, rectangular or square tube steel support structures are added on the exterior of the tank body, encapsulated and seal welded which eliminates the need for further support.

### About us

Plastic Welding & Fabrication, Ltd. (PWF) is a family-owned and operated business that focuses on fabrication of high-quality thermoplastic products. Our areas of expertise include process tanks utilized in the Hot-Dip Galvanizing industry, Aluminum Anodizing industry, and metal plating industry.
